has successfully completed the online, non-credit Specialization

# Certified Ethical Hacking (v12)

This Certificate is earned after successfully completing 4 courses on various topics in Certified Ethical Hacking (v12). The learner understands the core concepts of ethical hacking and has gained practical experience in identifying and mitigating security threats, securing systems and networks, and defending against sophisticated cyber-attacks. The earner of this Certificate has demonstrated proficiency in ethical hacking fundamentals, system and network security, and advanced cybersecurity by working on real-world scenarios. They have developed skills in vulnerability assessment, penetration testing, threat detection, and incident response.
