Introduction to Android Mobile Application Development

Programming Fundamentals in Kotlin

Create the User Interface in Android Studio

Advanced Programming in Kotlin

Jul 3, 2025

Anshdeep Rawat

has successfully completed the online, non-credit Specialization

Meta Android UI Development

Congratulations on completing the Meta Android UI Development Specialization! You've built a strong foundation in creating beautiful Android apps using Kotlin. This certificate recognizes your dedication to learning Android UI development and preparing yourself to create rich mobile experiences. Feel free to share it with your professional network. Throughout this journey, you've mastered Android Studio, learned Kotlin programming basics, and created user interfaces with Jetpack Compose. From implementing Material Design principles to adding eye-catching animations that bring apps to life, you've developed skills that professional Android developers use every day.
